Pathologist

Name : SOCO, CHRISTINE FE C.	Date : 08/11/2021
Age : 27 Gender : Female	File No. :
Exam : Chest PA	Company : SONIC SALES

Note: This report is based entirely on radiograph examination and should be correlated with clinical and laboratory findings.

RADIOGRAPHIC REPORT

As compared to previous study dated 11-03-2020, recent studies dated 7-29-2021 and 8-09-2021 shows no significant interval change in the hazy infiltrates in both upper lobes. The rest of the lungfields remain clear. The heart is not enlarged. Diaphragm and costophrenic sulci are intact. No other significant findings.

IMPRESSION:

- Bilateral upper lobe infiltrates, unchanged from previous study, may be attributed to radiographically stable PTB vs post-inflammatory fibrosis

Name : SOCO, CHRISTINE FE C.	Date : 10/18/2021
Age : 27 Gender : Female	File No. : 21-2634
Exam : Chest PA	Company :

Note: This report is based entirely on radiograph examination and should be correlated with clinical and laboratory findings.

RADIOGRAPHIC REPORT

As compared to previous study dated 8-09-2021, there is partial clearing of the hazy infiltrates in both upper lobes. The rest of the lungfields are clear. The heart is not enlarged. Diaphragm and costophrenic sulci are intact. No other significant findings.

IMPRESSION:

- Suggestive of bilateral upper lobe PTB, partially resolving
